

Installation Guide

Case CX---D Excavator KM 1097, 1098, 1099 Kit (PN: 6959, 6960, 6961)

- 1. Remove the original seat and suspension from the cab.
- 2. Place the PED 6145 into the cab and fasten down using four 8 mm x 25 mm flat head socket cap screws.
- 3. Remove the armrests from the new seat.
- 4. Place the seat into the cab onto the studs that are on PED 6145 and fasten in place using four 5/16" center lock nuts. NOTE: If you are installing a 1098 (PN: 8035) or a 1099 (PN: 8034) seat you will have to adjust the slide rails and move the seat forwards and backwards to get the nuts on.
- 5. If you are installing an air suspension seat, cut off the electrical connector from the OEM seat and splice it onto the new seat.
